

Semi-automatic parking systems

The urban trend in parking

KLAUS Multiparking. Premium quality for over 50 years.

Convenient parking in little space is a decisive factor in urban living – today more than ever before. KLAUS Multiparking realised this early. Since 1964, we have focused on the production of premium parking systems that satisfy the highest quality requirements. In doing so, we attach great importance to the “Made in Germany” factor.

At KLAUS Multiparking, this includes excellent service. Planning, implementation, maintenance and technical support therefore form a reliable system, which ensures the maximum cost effectiveness of our solutions. We are constantly developing our parking technology – geared towards the ever growing demands of designers and users, for an intelligent and convenient use of space.

Over 25,000 successfully implemented projects and more than 600,000 installed parking spaces tell their own story – and have prepared us for virtually any challenge.

Semi-automatic parking system TrendVario. Maximum flexibility and convenience.

Having your own parking space is an important part of high-quality properties, and it has a significant impact on urban living. The semi-automatic, premium parking system TrendVario is a contemporary and investment-safe solution.

TrendVario is a tried-and-tested system that creates convenient parking space in a small area. The combination of flexibility and urban design is unique. The innovative parking system can be adapted to architectural designs without any issues at all – a factor which significantly contributes to increasing the value of the property.

The TrendVario systems from KLAUS Multiparking also provide unlimited freedom and future security. They can be combined in a variety of ways and extended at a later time. The ability to upgrade and retrofit the system in terms of load and comfort is ensured at all times. An electric charging station and BikeSafe can also be integrated at any subsequent point in time.

As far as operation is concerned, TrendVario is also contemporary and highly convenient. There is also the option to operate the entire parking system using an app: parking as an everyday experience.

All the benefits of TrendVario at a glance:

- **Flexible:** Possible to upgrade and retrofit at any time
- **Individual:** Wide variety of models and designs, various optional extras
- **Economical:** Investment-safe solution to increase the property value
- **Reliable:** 360° service from planning to after-sales, architect support, KLAUS 24-hour service optional

TrendVario. All semi-automatic parking systems at a glance.

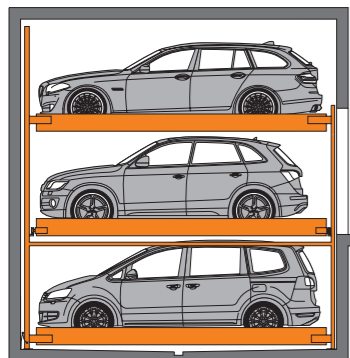

TrendVario combines maximum flexibility and safety with a high concentration of parking spaces. As standard, the load-bearing capacity is 2,000 kg per parking space and can be subsequently increased to 2,600 kg without the need for any structural changes.

TrendVario 4100

TrendVario 4100 can accommodate **two vehicles on top of each other** and the parking spaces can be shifted vertically or horizontally. A vacant space makes independent parking possible.

- Total height of standard type: 220 cm
- Pit depth of standard type: 200 cm
- Parking spaces: 3–29 vehicles | 2–15 grids

TrendVario 4300

TrendVario 4300 can accommodate **three vehicles on top of each other** and the parking spaces can be shifted vertically or horizontally. A vacant space enables independent parking.

- Total height of standard type: 375 cm or 405 cm
- Pit depth of standard type: 200 cm
- Parking spaces: 3–29 vehicles | 2–15 grids

04

Dimensions and features:

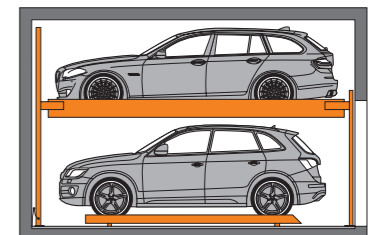

- Vehicle dimensions: heights 150–205 cm, lengths 500–520 cm
- Platform coating: standard coating
- Usable platform width standard type: 230 cm, optional up to 270 cm
- Operation: DialogDisplay with SmartChip (RFID), SmartPortable (wireless, infrared) and SmartApp or AluLongLife

TrendVario 4200

TrendVario 4200 does not require a pit. The semi-automatic system accommodates **two vehicles on top of each other**. A vacant space makes independent parking possible.

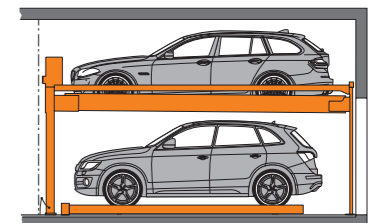

- Total height of standard type: 345 cm
- Parking spaces: 3–29 vehicles | 2–15 grids

TrendVario 4000

TrendVario 4000 can accommodate **two vehicles on top of each other** and the parking spaces can be shifted vertically or horizontally. The system can be driven through and combined with the TrendVario 4100, 4200 and 4300 systems as an additional row of parking. A pit is not required.

- Total height of standard type: 345 cm
- Parking spaces: 3–29 vehicles | 2–15 grids

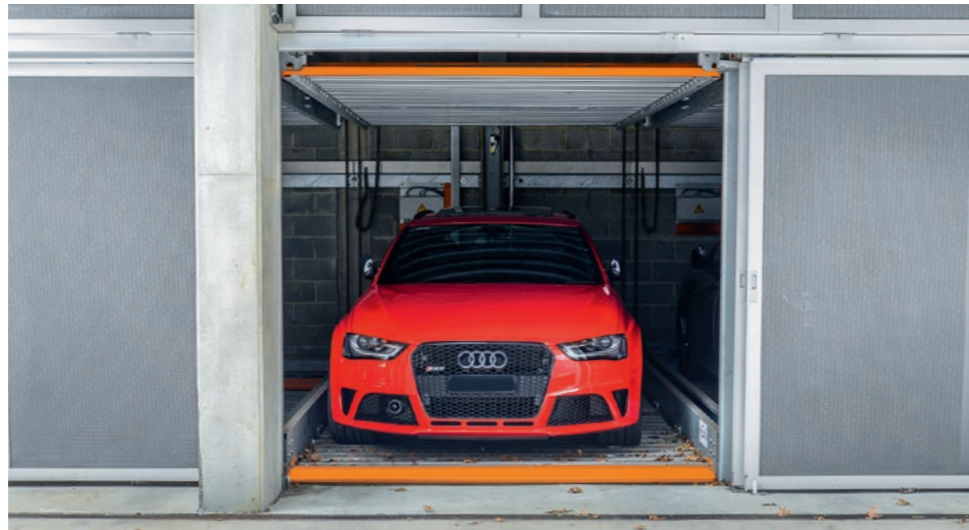

The combination of TrendVario 4000 and TrendVario 4300 enables the maximum number of parking spaces.

05

- Level platform access
- 2 vehicles on top of each other
- 3 vehicles on top of each other
- Max. load per parking space in kg, special design at additional cost

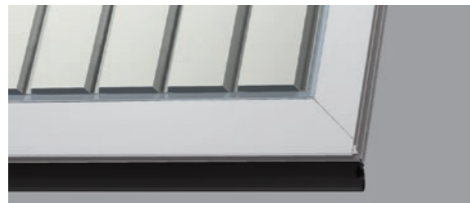

Diverse and attractive: Gates in several colours and materials.

Our gates are functional and achieve the highest design standards; there are numerous combinations to choose from. Around 50 individual variations are possible in different materials and colours. Whether on the facade or in the basement, you will find the right gate for every area in the home. This will increase the appeal of the building and increase the value of the property.

Beaded steel plate

Plain aluminium sheet

Perforated steel plate

Wooden panelling, Nordic spruce

Perforated aluminium plate

Laminated safety glass

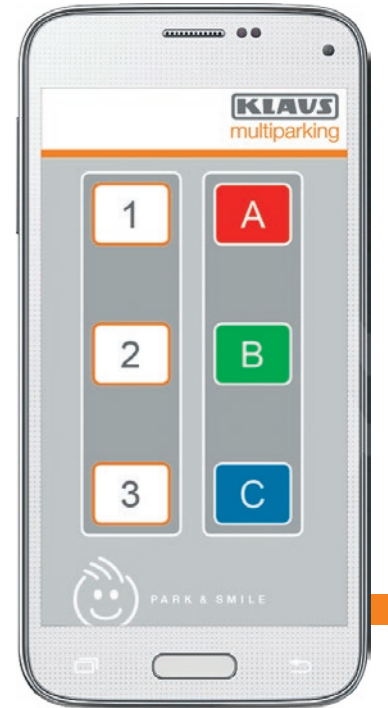

Secure and convenient: Electronic operating systems.

It is primarily the secure and convenient access and user authorisation that makes TrendVario complete. There are several electronic operating systems to choose from. They can be perfectly adapted to the technical infrastructure. Standard operation is carried out using SmartChip and RFID directly on the garage. Access using the handy SmartPortable device, which transmits wireless or infrared signals, is more convenient. Even more innovative is operation using SmartApp on a smartphone.

Access the parking garage using your smartphone.

Smartphones are already a firm fixture in our digital day-to-day life. That's why KLAUS Multiparking offers the SmartApp for TrendVario. You can request parking spaces, open or close gates or switch on garage lighting with ease. Aside from a high level of convenience, it goes without saying that security is also a top priority for this innovative operating concept.

Strong and stable in value: Platform profile sheets for platform coating.

EasyWalk

This platform coating consists of continuous, galvanised steel tread with 12 mm high "beads" that run perpendicular to the platform. It is ideal for anyone who values the advantages of a modern platform coating with an excellent walking and driving surface and wants a higher level of convenience than offered by the "Standard Grip" base model.

AluLongLife

In many respects, aluminium profile is an unrivalled material with excellent everyday properties:

- Rust-resistant
- Durable and stable in value
- Low maintenance
- Lightweight and yet extremely strong
- Excellent resistance to corrosion and weathering
- Outstanding qualities in terms of being walked and driven on
- High resistance to abrasion

When you smile, we have achieved our goal.

Premium parking systems from KLAUS Multiparking are tailored to individual requirements. They use the available space efficiently and enable easy access and exiting. Each of our systems is the result of decades of experience, solid know-how and the high quality of our products made in Germany.

That applies all over the world: With more than 600,000 installed parking spaces and 65 sales partners on all continents, we are one of the world's premier suppliers of innovative multiparking systems.
